

# Dental Plan

## DENTAL NETWORK BENEFITS

With this benefit, you will save 10% to 40% at thousands of dental offices nationwide on your dental care. To find a participating dentist(s) in your area, simply call our toll-free number. You will save on routine dental services such as cleanings, x-rays, and fillings as well as specialty care such as orthodontics, periodontics, and endodontics.

The Dental Network Plan is so comprehensive that it even works well if you already have dental insurance by lowering or eliminating the deductible and covering expensive procedures not customarily covered in an insured plan.
